

# Energy Minnow

Though the second largest of the Energy Forms encountered in deep space, Energy Minnows pose the least threat to space travelers. Driven reasons as yet incomprehensible, or simply by their solitary nature, these lone scouts travel deep through the reaches of the Pardus Cluster, easily distinguishable as part of the Energy classification due to their unique bluish-white incandescence.

## Locations

Energy Minnows spawn on energy tiles in the Pardus Cluster, the North Pardus Rim, and the South Pardus Rim.

## Stats

### Skills

Tactics	20
Hit accuracy	20
Maneuver	25
Weaponry	40
Engineering	45
