

Euryale Swarmlings

Euryale Swarmlings, though numerous, are arguably a rare creature to encounter, due to the fact they are able to reach full maturity in an unprecedented two months. Swarmlings often left to ripen in the preserved cavities of the Euryale's host victim, they slowly eat their way to freedom in order to wreak havoc on the numerous other species through the galaxy.

Locations

Euryale Swarmlings spawn near a [Euryale](#), and are found exclusively in the Pardus Cluster.
