

# Killing an infestation

1. Find the hatcher
  2. Get the hatcher to very low hull, but do not kill
  3. Sweep the 13x13 area centred on the hatcher, killing all larvae you find. Larvae also spawn under other NPCs, so you will need to remove those NPCs.
    1. Tip: Larvae may be hiding under dangerous non-roaming NPCs such as Dreadscorps and some Zs. Get help or plan your APs accordingly.
  4. Once all larvae in the 13x13 are dead, quickly kill the hatcher before a fresh cloud of larvae spawns.
